

The background is a dark navy blue. In the top-left corner, there are two overlapping geometric shapes: a blue parallelogram and a light green parallelogram. In the top-right corner, there is a grey, 3D-rendered circuit board pattern. In the bottom-left, there is a circular, semi-transparent image of a physical circuit board. The title text is centered on the right side of the slide.

Matching Twitter and blockchain activities

Cycle diagram

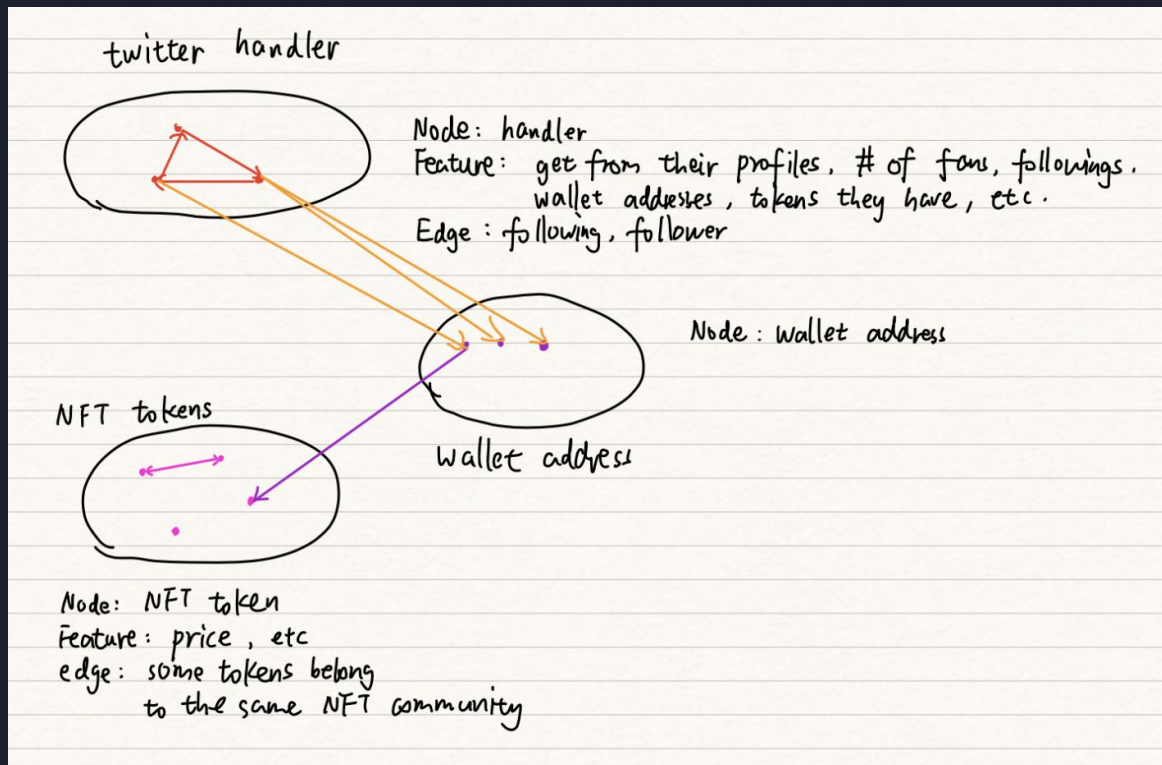

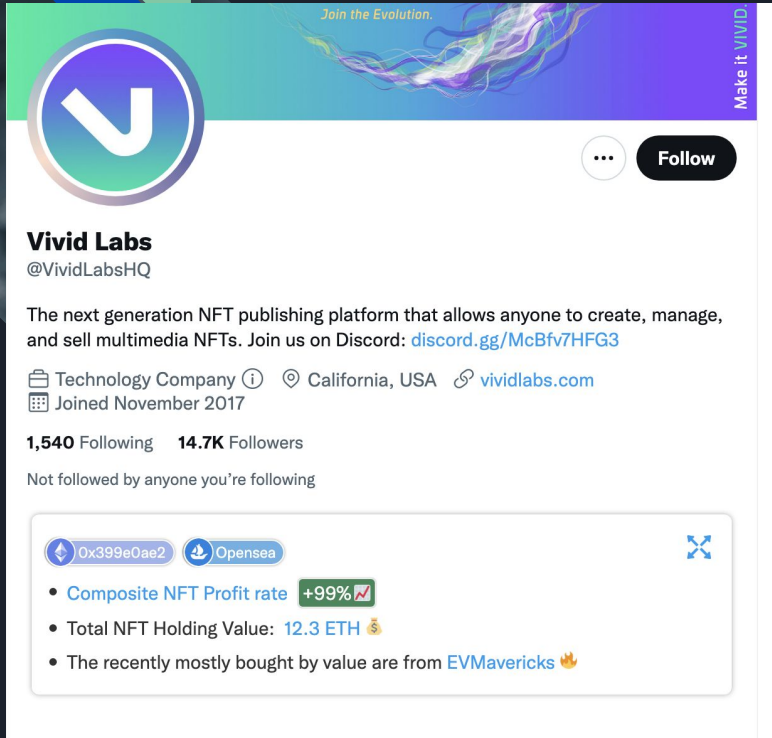

Understanding the problems

- 01 Twitter is in the real world, including social connection and activities of some users, e.g. whales in NFT, celebrities, NFT community.
- 02 Wallet has activities such as buying, selling, minting NFTs. These activities are documented in blockchain.
- 03 Twitter <-> Wallet activities can help build a **profile** of twitter user, to analyze its social connection, daily activities, pump/dump operations. If some operations are not consistent within Twitter and blockchain, it should be noticed.
